

BNP Paribas expands the usage of PREDATOR to Asia. In a logical move following the signature of a global contract for the flagship product of Teleinvest, the wealth management arm of BNP Paribas has recently equipped its Singapore and Hong Kong branch offices. Other Asian sites are bound to follow suit.

“As our client has decided to move its worldwide IT hub to Singapore, it is important for us to have PREDATOR users on the spot” comments Joseph Kuettel, director of Teleinvest International, “This is not our first client in Asia, but it will definitely strengthen our presence in a region with growing importance for electronic trading platforms for buy-side and sell-side.”
