

Banque Privée Edmond de Rothschild Europe, a leading buy-side Luxembourg actor, has signed with TELEINVEST International to implement its trading system PREDATOR. In particular, PREDATOR will include STP from the banking system Olympic to the following order routing networks: Bloomberg's TSOX (fixed income) and EOR (equities); futures and options via J.P. Morgan and access to the reconciliation service from Omgeo.

In addition the traders will benefit from the new module 'market depth multi-market' based on the real-time Market Data Feed (MDF) from SIX Financial Information, a leading European data vendor.

"This is another milestone in the international expansion of Teleinvest International", comments Joseph Kuettel, director sales & marketing, "it vindicates our ongoing efforts and fundamental product and service quality which already enjoys top reputation".
